

# Are you a Wilbert?

Launched for the discerning gardener, Nutscene Direct offers quality gardening giftware, twines and sundries, sourced from sustainable sources using natural materials such as jute, wood, English terracotta, flax & sisal.

[www.nutscenedirect.com](http://www.nutscenedirect.com)

Our Wilbert loves his Nutscene twines! Since 1922, Wilbert has used Nutscene natural jute twines in the garden. Jute, a natural fibre is produced from sustainable sources and is easily and safely composted. Knowing that Nutscene produce their natural twines from machinery used since 1922, gives Wilbert the assurance that both he and Nutscene Have Been Green Since 1922.

The name Nutscene was derived from their renowned green jute twine, which once tied round the plant was 'not seen'.

The Nutscene team produces a range of design-led giftware, designed in-house from their factory, nestled within the beautiful hills of Angus Scotland.

The finest selection of:

Garden Twines & Cords

Gardening Sundries

Plant Accessories

Design-led Giftware

Italian vegetable Seeds ('Alta Selezione')

Now available on-line to customers both in the UK and world-wide.

Visitors to the site are also privy to peek at Wilbert's gardening diary – a personal log of both his gardening triumphs and (occasionally) disasters!

*For both the experienced gardener and those seeking  
a certain potting shed chic™...*
